

FMD-20 is an irregularly shaped and sharp abrasive ensuring excellent particle retention. It is effective where low cutting forces are required, for metal and electroplated bonds, in applications such as glass and ceramics grinding, gemstones and cast iron grinding.

## Properties

- ▶ medium to low toughness
- ▶ irregular particle shape
- ▶ rough crystal surface
- ▶ medium thermal stability

## Applications

- ▶ OD, profile and general grinding
- ▶ finishing tools, cut-off wheels
- ▶ glass, quartz, tungsten carbide

## Bonds

- ▶ metal
- ▶ electroplated
