

FMD-40 is an angular abrasive ensuring excellent particle retention, slightly tougher than FMD-20. This product is recommended for electroplated and metal bonded tools, glass and ceramics grinding, gemstones and cast iron grinding.

Properties

- ▶ medium toughness
- ▶ blocky but angular particle shape
- ▶ slightly rough crystal surface
- ▶ medium thermal stability

Applications

- ▶ surface, flute, deep and general grinding
- ▶ cut-off wheels, 1A1-wheels
- ▶ glass, cast iron, composite materials

Bonds

- ▶ metal
- ▶ electroplated
